DERCO USA

Derco USA is a fabricator of custom made conveyor belting, plastic modular, and monolithic belting for all industries, including a full line of meat and poultry belts. Located in Newark, Delaware, we stock hundreds of different styles of belting.

All products are made to order and manufactured here in the United States at our 50,000 square foot facility.

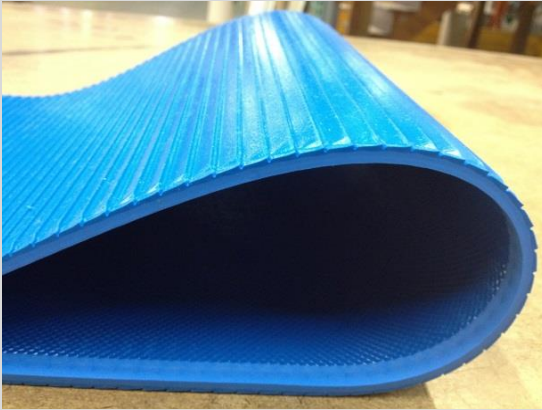

We house a variety of specialized equipment that is used to fabricate belts with European style quality while helping our customers avoid long lead times and import fees from overseas shipments.

When you're not sure who to call – We can help

DERCO USA'S LINE OF MEAT AND POULTRY BELTS

PVC / URETHANE / PLASTIC MODULAR / MONOLITHIC

Derco USA stocks and fabricates lightweight belting with various profiles specifically designed for the meat and poultry industries.

Our capabilities include the ability to seal the belt's edges, ensuring that no fabrics are exposed and providing protection against edge fraying.

We can also add various top cover profiles to our belts in-house so you can provide a custom made solution to your customers.

Derco's line of NGB Plastic Modular Belts are the perfect fit for hard to maintain applications.

Modular belts are strong, easily cleanable, and USDA and FDA approved. They require minimum breakdown and maintenance, less energy consumption, no fraying and are easily tracked.

Temperatures range from -100 degrees F (freezers) to 266 degrees F and pitches from 2" to ½" for easy transfer of goods making this a very versatile product for the meat and poultry industry.

Derco's line of Monolithic belts contain no fabric or chords and are a hygienic solution for meat and poultry applications.

Belts can be fabricated with various cleat and guide configurations and can also be custom profiled to meet your desired specifications.

Joining the belts on-site can be done with ease with our joining kits and we also have a full range of vee, round, and profile belts to compliment the line.
